Dear Greg,

Congratulations! Through your continued efforts, you have met the standards of the CLCA Water Management Certification Program and you are now a CLCA Certified Water Manager.

— Founding Partners —

This is a major milestone in your journey; however, it is not the end of the voyage. As a CLCA Certified Water Manager, you must maintain your certification. In lieu of C.E.U.'s (Continuing Education Units) the CLCA Water Management Certification Program requires that you continue managing your qualifying property to the program standards for the duration of your certification. Monthly meter reading and submittal is mandatory. Your certification status will be reviewed quarterly. For more information and the rules of the Performance Program go to:

<http://www.clca.us/water/memOnly/test.html>

As a CLCA Certified Water Manager, your name will be added to the CLCA website here: <http://www.clca.us/water/mgrs.html>. You will also be sent decals for your vehicle and a certificate suitable for framing.

— Charter Partner —

I encourage you to strive for the next level of Expert Certification, where you must maintain five sites to a higher standard of performance. Here's more information from the CLCA website:

Expert Certification: *CLCA Expert Water Manager. Pass the written test and manage five properties for one year and continue to manage five properties at or below the water budget established by the CLCA Water Management Performance Program. In addition, the water use may not exceed 80 percent of ETo. However, if a local jurisdiction defines "on budget" or other landscape water consumption requirements that are more demanding than 80 percent of ETo, the program will require the local standard.*

Again, you are to be congratulated for your achievement and becoming part of a very select group of landscape professionals throughout the State of California.

Regards,

John Moore
